### Bank's internal approach to assess capital adequacy

Bank's management regularly reviews Bank's capital adequacy. Plans and budgets are prepared on the basis of current and projected capital adequacy. Bank's plan and investment decision is based on at what level of capital adequacy it wants to remain at.

### Risk Management Function

#### Risk Assessment/Mitigation Practices at Kumari Bank Limited

Considering the need to establish effective Risk Management and Risk Mitigation practices at Kumari Bank Ltd, we have developed a system of continuous improvement of processes wherein each member of the Bank works towards balancing profitability with prudence. The system encompasses all banking functions from client interface, to back office operation, to the strategic decision formulated by the management committees and the Board of Directors. Each area has its own check and balance procedure to assess and mitigate risks involved. The practices thus observed are as follows:

## **KBL Organization Structure**

The bank's lending approval authority is divided into two distinct units, namely Business and Risk Management. While the Business Unit concentrates more on optimum utility of assets, every lending decision of this Unit is re-assessed and revaluated by the Risk Management Unit for final approval. The Risk Management Unit applies its objective judgment on risk variables deemed appropriate in each instance of lending decision. For this purpose, the Risk Management Unit has two distinct subunits, the Risk Approval Department, which facilitates final lending decision after duly adjusting risks as mitigated to an acceptable level, and the Credit Administration and Control Department, which evaluates the endorsed paperwork prior to actual sanction, and also after it.

Depending upon the volume of loans and the nature of risk associated, lending decision are subject to validation and approval by various levels of the hierarchy, in which some lending decision are to be approved by the General Manager, and other by even the Board of Directors as each case may require.

## **Risk Measurement Criteria and Mitigation Process**

Credit risks are evaluated from the initial customer interface on an array of risk variables by the Credit Policy Guidelines of the Bank, as well as on the individual intuition of experienced officers. As proposals are escalated for approval, judgmental and analytical criteria become broader and more conceptual.

Kumari Bank Ltd. uses the best practices in banking, to make its operation secure through a system of procedural crosschecking mechanism in each operational transaction. An Internal Audit Department, which also doubles as the Concurrent Audit Department system, continuously functions to alert bank personnel to the meticulousness required in handling operations in every functional department. A credit monitoring system is well established in the Bank, which periodically checks on credit quality, compliance, and level of risk exposure. This practice has created a continuous learning and improvement environment, and the Bank's efficiency goal has been to move towards the most prudent practices in the industry.

## **Types of eligible credit risk mitigants used and the benefits availed under CRM -**
